Beschreibung

Noch bis in die zweite Hälfte des 20. Jahrhunderts konnten wir unseren Zweifeln am System und an der Zukunft durch Science Fiction und Utopie-Entwürfe in Literatur, Film und Architektur angemessen Ausdruck verleihen. Inzwischen scheint hingegen unsere Angst vor Veränderungen gesiegt zu haben. Zweifel werden durch strikte Vorgaben unterbunden. Technischer Fortschritt und die heutige Präzision im Planen lassen keinen Freiraum, um auszuprobieren, zu überdenken oder zu misstrauen.

Wir wollen nicht behaupten, dass die Architektur – als Disziplin und als Kunst – gar keinen Platz für Skepsis mehr hat. Zweifelnde Fragen bewegen sich jedoch oft nur innerhalb fester Grenzen, die uns an unserer Weiterentwicklung hindern. Hinterfragt wird um des Hinterfragens willen, ohne der Intuition des Zwiespalts zu vertrauen oder Konsequenzen zu ziehen.

Students eat more fruits, vegetables if they have recess before lunch. 28-Jan-2015 - By Elizabeth Crawford. Playing first, working later may not seem like a recipe for success, but when it comes to convincing more students to eat their fruits and vegetables it is a no-cost. Slip on a shirt, slop on some sunscreen, slap on a hat.

Abstract. New expressions are presented for light propagation in media for the whole range of absorption and for isotropic as well as for anisotropic scattering with an average cosine of the scattering angle between 0 and 0.9995. The method is based on the rigorous solution of the transport equation for Rayleigh-Gans.

The double spherical harmonics method (DPn approximation) was originally suggested by Yvon (1957) and employed first by Yvon (1957), Ziering and Schiff (1958), and Stewart and Zweifel (1958) to the problems of neutron physics. Solutions for cylinders and spheres were first reported by Drawbaugh and Noderer (1959).
