You should walk as fast as you can. The rain wets you in two different ways: by falling on your head and shoulders and by colliding with your front as you walk forward. The amount of rain that lands on your head and shoulders is directly proportional to how long you are in the rain, but the amount of rain that hits your front.

How Things Work: Food energy. Photo:Ed Yourdon. As media headlines have been telling us in the industrialized world for quite some time now, being overweight or obese greatly increases a person's risk of heart disease, stroke, diabetes and other chronic diseases. With rapid globalization these so-called western lifestyle.
